Remove the hard drive before throwing out or giving away your computer. Destroy your hard drive with a hammer. Help prevent Cyber Fraud

---

RU20-CS: Back

Cyber Safety and Children
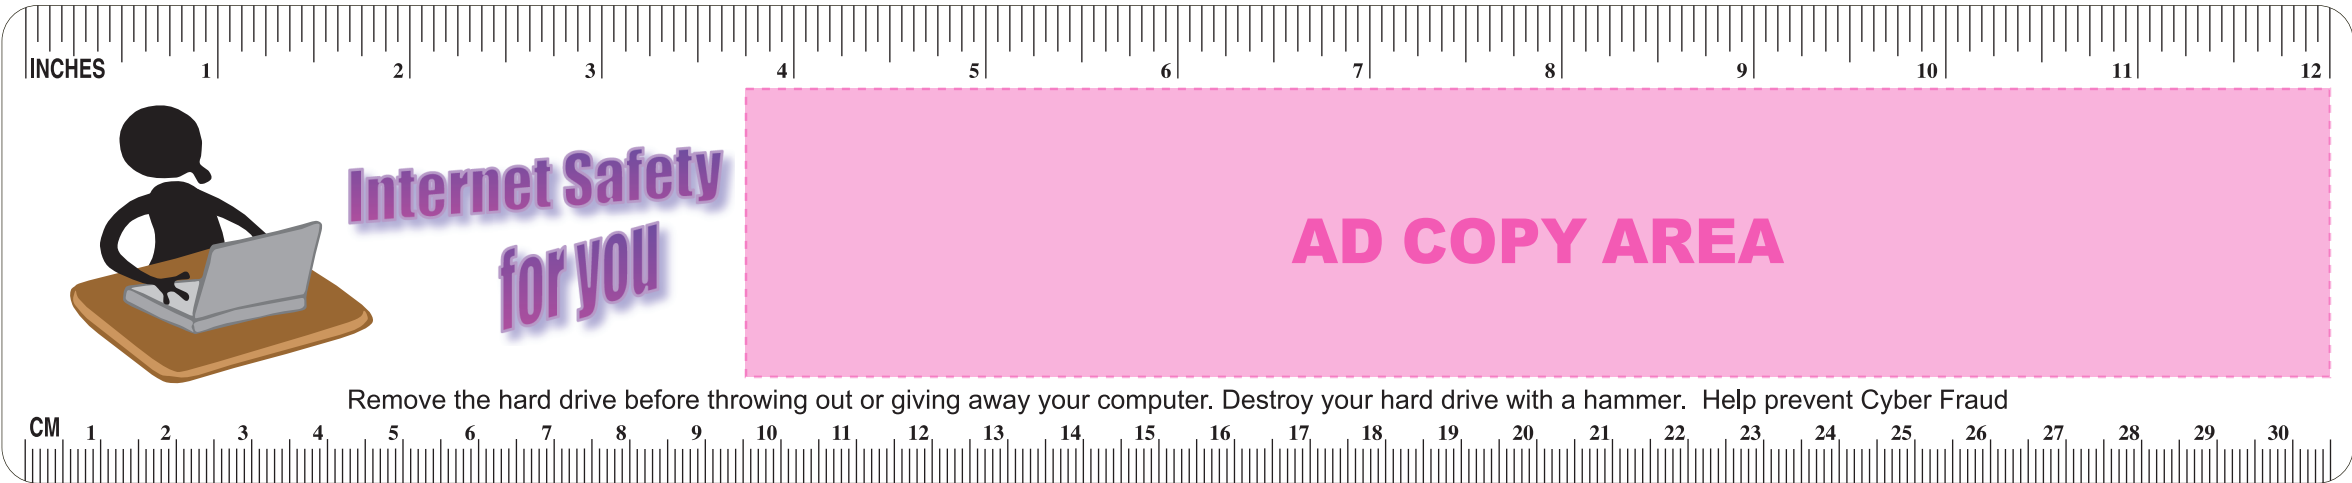

Email
1) You won't win anything on line.
Cyber Criminals' favorite are Lottery prizes
2) Junk Mail; don't open unless sender
is known
3) Don't use your name as an email address.
Identity theft can start here
4) Email addresses are personal.
With a blanket email use BCC for addresses
5) Never open unknown received mail/
attachments as a Virus/Trojan can be
active, trolling your address book and
hard drive and then passing itself on.

Chat
1) Log all chats. Each "chat" program can
record onto hard drive. Activate it.
2) Be aware of meeting Chatters. Use public
places, take a friend or meet later at a designated
time or call on a mobile phone (not text) regularly.
3) Habits of Chatter. If you don't understand a
response or question; ask; they may be older
then you think
4) Photographs. May not be up to date
or be that person. See #2.
5) Webcams. Never put on a
"floor show" as who is watching?
Where will it end up?

Fraud
1) Bank emails. Never open. They will
never email you; they use the Post Office
2) Ebay email. Latest offers after you used
their service? Delete. Then go on Ebay
and check out any offers.
3) PayPal email. See Ebay
4) Phone numbers. When they
come in an email asking you to
call; don't if you don't know them.
5) Inheritance Email. Delete! This will
come in the US mail.
6) Microsoft Junk email. Delete. They
never email unless you subscribe

Passwords
1) Never write them down
2) Use different on each website
and more of a change than 1 figure
3) Change passwords each month
4) Never share passwords
5) Never email passwords
6) Ignore requests to share passwords.
No one needs to know this info; not
even the company web site you use;
only their computers do.
7) In addition to passwords, never e-mail
credit card numbers or acct. numbers

Questionable Websites
1) All websites are lockable.
Responsible parents should take
this action on all computers
(also email & chat)
2) Downloading a new program
from the internet? Save it rather
than Run.This way, Spyware can
scan and remove problems.
3) Perform regular virus and spyware
scans and up-dates.

Please remove all guideline indicators before submitting artwork

☐ **= Final Cut Size: 12.25" x 2.5"**

▨ **= Ad Copy Area Front: 8.25" x 1.5"**
